## Mills Hill to Moston Rochdale Canal Walk

This railway station to railway station walk connects Mills Hill to Moston using the Rochdale Canal Towpath.

Take some steps in history as like many railways close to a canal, the canals carried vital materials to construct the railways.

- 1** Exit Mills Hill Station and head east along the A669 for a short distance, the route crosses over the Rochdale Canal.
- 2** Look for the steps to the right leading down to the Rochdale Canal towpath. Follow the canal towpath south for approximately 2 miles.
- 3** Head under the long bridge of the A663 and look for the steps to the left up to the road. Take the steps and enter the pedestrian provision, head south west and use the crossing over the first motorway slip road, cross the motorway and use the second crossing over the motorway slip road and enter the quiet street of Broadway running parallel to the dual carriageway.
- 4** Use the pedestrian crossing over the dual carriageway and turn left then immediately right onto Mough Lane. Follow Mough Lane for a short distance until you reach Owler Lane.
- 5** Turn left onto Owler Lane and follow until you reach the A6104, Hollinwood Avenue.
- 6** Use the pedestrian crossing to cross the A6104, and head east, Moston Railway Station should be visible.
- 7** You have arrived at your destination, north and south bound platforms can be accessed either side of the railway bridge.
